

Professional Mask Filling & Sealing Machine

MFS-04/MFS-02

Application

This machine is special designed for mask filling and sealing automatically & professionally.

Features

1. Automatic bag feeding, liquid filling, sealing, printing and bag out feeding.
2. All contact parts are made from Stainless Steel #316, complying with GMP requirements.
3. Variable filling machines can be chosen for different filling material. Standard is electrical gear pump. Pneumatic piston pump is an option for viscous material filling.
4. No bag, no fill, no bag, no seal.
5. PLC combined with touch screen control system. Parameters and operation can be done in the panel. Production output and the error message can be easily seen from the screen.
6. Digital temperature controllers.
7. Selected electric and pneumatic components from reliable international manufactures.

Specification

Model	MFS-04	MFS-02
Process	Auto. Bag feeding, filling, sealing, printing, unloading	
Lane No.	4	2
Capacity	2200-3000pcs/h	1200-1500pcs/h
Bag Size	W: 90-140mm; L: 100-180mm	
Standard Filling Pump	Electrical Gear Pump	
Power	220V/1ph, 3KW	220V/1ph, 1.5Kw
Compress air	0.6Mpa	0.6Mpa
Machine Size	L5200xW900xH1700mm	L2600xW900xH1700mm
