

Automatic Tube Filling and Sealing Machine

TFS-205/305

Sealing Method

Application

This is fully automatic high speed rotary heat seal plastic tube fill-seal machine. It is suitable for cosmetic, pharmaceutical, foods, chemical, etc...

Features

1. Automatic tube loading, filling, heating, sealing, cutting and tube unloading.
2. The precision of mechanical linking visual detection is within 2 mm.
3. Mechanical tube feeding. Only one unit need to be changed when tube size changing.
4. Inner Heat System, using "Leister" hot air system to assure high quality sealing.
5. Servo motor controls filling, filling volume can be easily adjusted in the touch screen.
6. Plug-in filling type fills the product from the bottom of tubes, which ensures less air mixing with the filling material and decreases the possibility of oxidation.
7. All contact parts are made of Stainless Steel #316, complying with GMP requirements.

Specification

Model		TFS-205	TFS-305
Tube Size	Diameter	10-50mm	20-60mm
	Length	70-200mm	70-280mm
	Volume	5-250ml	50-500ml
Capacity		30-40 tubes/min.	30-40 tubes/min.
Voltage		380V/3ph, 5Kw	380V/3ph, 5Kw
Heating Method		Inner "Leister" hot air system
